Attention Please !

In past years our annual wholesale pricelist has been issued in the fall after heavy advance sales had been made during the summer months and many fine items were sold out. Now, in order to give all our customers an equal opportunity to obtain our material, particularly new, scarce, or difficult to propagate items, we issue this list at this time.

For special quantity rates on advance orders see under QUANTITIES — inside of back cover.

NEW ITEMS

In addition to our regular lines we are continually developing or introducing additional novelties and specialties. For the past 20 years we have doubtless imported the greatest assortment of new and rare woody plants brought into this country during that period, and at the same time have carried on a program of breeding various woody ornamentals, including Lilacs, Flowering Quinces and Flowering Fruit Trees, etc.

We are continuing both of these programs and new items will be offered as rapidly as stock becomes available. In order to call your attention to some of these that are now available we have "boxed in" many plants of special interest.

PINTO TAG

We take pride in being a "Pinto Tag" nursery, enabling us to ship into nearly all California Counties with no point of destination inspection required.

DESCRIPTIONS

Short descriptions have been included in this list for the benefit of customers who are not acquainted with our stock. Where further information may be desired it will be given promptly on request.

CLIMBERS	46
WISTERIAS, CLIMBING	48
WISTERIAS, TREE FORM	48

EXPLANATION OF HARDINESS RATINGS

As this list goes all over the U. S. A. and also abroad, we believe it a good idea to indicate hardiness. This has been done by giving after the name of each item a number in () indicating the one up to which it is considered hardy.

Our authority through Zone 7 is Rehder's Handbook. For Zones 8 to 10 we have been guided by Pacific Coast experience and have subdivided Zone 9 so that

(9) indicates probably safe to 20° (Sacramento and San Joaquin Valleys, etc.).

(9½) indicates probably safe to 25° or 26° (San Francisco Bay Region, etc.).

(10) indicates will stand only very light frost.

To find the zone you are in refer to the map in center pages of this book, which we use by the courtesy of Arnold Arboretum and McGraw Hill Book Co.

We hope this will be helpful to nurserymen all over the country. Please understand that ratings show our honest opinion, but we disclaim all responsibility for their correctness.

ABBREVIATIONS

Letters A, B, C, D, E, etc., after variety names indicate the sizes available.

POT GROWN AND GALLON CAN STOCK

We find that many customers, especially those at a distance, prefer to have us remove soil and ship "bare roots" packed in moss. If you order any of this class of material please be sure to say whether you want it packed with or without soil on the roots.

We have enlarged our facilities for the production of quality gallon can stock and from now on we will be able to offer more high class ornamentals in gallon cans. We will continue growing 4 in. pot stock for field planting, and for shipping orders where weight is a factor. When available, we will also offer 2½ and 3 in. pot stock as lining out material, but have none to offer this season.

LOCATION

Office and Sales Yard located on Oakland-San Jose Highway at Coyote Creek Bridge, about one mile north of San Jose City Limits. Other growing grounds are within a mile or two of the office. Visiting nurserymen are welcome at all times.

Conifers

Unless otherwise stated, all plants in this section will be balled at prices quoted.

ABIES concolor (6)

WHITE FIR

The famous Silver Fir of the Sierras. Resistant to drought and heat. Moderately slow growing.

CEDRUS atlantica glauca (6)

BLUE ATLAS CEDAR

Young plants have a stiff open appearance but quickly develop into beautiful full specimens.
2½ to 3 ft. 3.25 3.00

deodara (7)

DEODAR CEDAR

Makes a large graceful specimen tree. Foliage gray-green.

6 to 7 ft.	4.75	4.50
5 to 6 ft.	4.25	4.00
4 to 5 ft.	3.75	3.50
3½ to 4 ft.	3.50	3.25
3 to 3½ ft.	3.25	3.00
2½ to 3 ft.	3.00	2.75

deodara repandens (7)

SPREADING DEODAR CEDAR

A very attractive weeping form of picturesque habit. Should be staked for first few years.

2½ to 3 ft.	3.25	3.00
2 to 2½ ft.	3.00	2.75

CHAMAECYPARIS lawsoniana ellwoodi (5)

ELLWOOD CYPRESS

A moderate grower of columnar habit. Foliage silvery blue, fine and lacy. Grafted plants have proven to be more vigorous and disease resistant.

4 to 4½ ft.	3.50	3.25
3½ to 4 ft.	3.25	3.00
3 to 3½ ft.	3.00	2.75
2½ to 3 ft.	2.75	2.50
2 to 2½ ft.	2.50	2.25
gal.65	.60

lawsoniana knowfeldensis (5)

KNOWFELD CYPRESS

Habit graceful, upright and arching. Sage green foliage.

2 to 2½ ft.	2.25	2.00
gal.80	.75

CONIFERS**CHAMAECYPARIS** (continued)

lawsoniana lanei (5)		10 rate @	100 rate @
LANE GOLDEN CYPRESS			
One of the newest clear golden yellow forms similar to <i>C. lawsoniana stewarti</i> .			
2 to 2½ ft.	2.25	2.00	
1½ to 2 ft.	2.00	1.75	

lawsoniana minima (5)

DWARF LAWSON CYPRESS

Extremely dwarf and compact with dark green plumeous foliage.

gal.	1.35	1.25
4 in. pot.	1.20	1.10

lawsoniana minima aurea (5)

GOLDEN DWARF LAWSON CYPRESS

Differs only from above in its golden foliage.

4 in. pot.	1.20	1.10
------------	-------------	-------------

lawsoniana moerheimi (5)

MOERHEIM GOLDEN CYPRESS

Bushy, erect habit. Tips of branches yellow variegated. A good sturdy grower and transplants easily.

2 to 2½ ft.	2.25	2.00
1½ to 2 ft.	2.00	1.75

lawsoniana nidiformis (5)

BIRDNEST CYPRESS

Branches semi-ascending and drooping toward tips. Natural growth wider than tall.

1½ to 2 ft.	2.00	1.75
1 to 1½ ft.	1.75	1.60
gal.	.80	.75

lawsoniana stewarti (5)

WINTERGOLDEN LAWSON CYPRESS

Growth slow, compact and erect. Remains as brilliantly golden in winter as in summer.

3 to 3½ ft.	2.75	2.50
2½ to 3 ft.	2.50	2.25
2 to 2½ ft.	2.25	2.00
1½ to 2 ft.	2.00	1.75

***altaclarensis wilsoni* (7)**

A broad, spiny leaved Holly bearing large red berries.

aquifolium Chambers* (5)*ENGLISH HOLLY**

The handsomest form of English Holly we know. Growth symmetrical and compact; foliage of medium size and prickly margined. Bears a most profuse crop of well placed berries.

aquifolium Golden Milkmaid* (5)**aquifolium Golden Variegated* (5)**

Leaves are very prickly and wavy and heavily blotched golden yellow.

aquifolium pendula* (5)*WEEPING ENGLISH HOLLY**

Makes a large shrub, wider than tall. Habit is partially weeping.

aquifolium Silver Marginated***aquifolium Van Tol* (5)**

Has heavy dark green leaves, only slightly prickly. Bears large bright red berries in profusion. Self-fertile.

cornuta* (7)*CHINESE HOLLY*****cornuta burfordi* (7)****BURFORD HOLLY**

Berries in extreme profusion, large, bright red. Grows and bears well in hot areas.

ILEX San Jose Hybrid (7)

(*altaclarensis wilsoni* x *sikkimensis*)

Of vigorous upright habit. Extremely heavy leathery foliage from 2 to 3 in. wide and five inches or more long, with wavy prickly margins. Berries large, deep red.

HARDI NESS MAP

HOW TO USE THIS MAP

From it determine what zone you are in. Every item carrying your zone number or a smaller number should be hardy with you. If you want to gamble on those rated one zone greater, there is at least a chance for success but two zones greater will probably be hopeless.

For full explanation of the entire system see Page 1.

Deciduous Trees

Unless otherwise stated, all plants in this section will be dug "bare roots."

ACER dasycarpum (3)

Lilacs

SYRINGA vulgaris (3)

We fully believe that our active propagating list embraces the most up-to-date collection of lilacs offered to the trade in this country.

It seems absurd to see so many ancient varieties still being listed. They were all good when originated 75 or 100 years ago but there has been plenty of progress in the meantime, particularly in the size of the individual flowers or "florets" as they are sometimes called and also in a wider range of color tones. If your collection is not really up-to-date why not do something about it?

(Lilacs must be ordered in multiples of 5 of each variety as they are bundled that way when dug).

E	1 to 1½ ft.....	1.10	1.00

Letters after varieties indicate sizes available.

CLARKE'S GIANT, BCDE, Plant Pat. No. 754

The flowers are **single**, soft gentian blue of enormous size, 1¼ to 1½ inches across, borne in huge clusters of unusual pyramidal form, up to 12 in. or better and 7 to 8 in. wide at base. Flower clusters are carried well above the large foliage. Fragrance leaves nothing to be desired. East of Rockies this is obtainable from Wayside Gardens, Mentor, Ohio.

ESTHER STALEY, DE; Plant Pat. No. 768.

Fills all the requirements of a good single pink lilac. Opening buds are red; flowers, large **single**, and pure pink without the usual lavender tinge. Clusters are of good size and produced freely in midseason; growth very vigorous. East of the Rockies this is obtainable thru Wayside Gardens, Mentor, Ohio.

MME. CHAS. SOUCHET, BCDE

One of Lemoine's Latest Introductions!

We quote his description verbatim.

"This beautiful novelty will create a great sensation among Lilac lovers. Very large and regular **single** flowers of the purest sky blue with enormous panicles. This variety is very floriferous and even blooms on young plants."

PINK SPRAY, DE; Plant Pat. No. 831.

A delightful **single** pink variety which is earlier than Esther Staley and a somewhat softer pink, contrasting well with the dark rosy mauve buds. The flowers have a daintiness and charm which is hard to describe and is enhanced by the stamens showing prettily. Cut flowers last unusually well.

PURPLE GLORY, BCDE; Plant Pat. No. 946.

Long pyramidal clusters. Flowers **single**, 1 to $1\frac{1}{2}$ inches wide, dark ruddy purple. Mid-late.

PURPLE HEART, BCDE, Plant Pat. No. 832

This very early variety has purplish black buds opening to deep purple, **single**, very large flowers attaining between $1\frac{1}{4}$ to $1\frac{1}{2}$ inches in width, borne in large clusters. Preferred by many to Marceau which is high praise indeed.

SPLENDOR, DE; Plant Pat. 837.

The dark ruddy purple buds open to purplish blue, moderately large **double** flowers in clusters of good size. Blooming time is from mid-season to late as it flowers over an unusually long period. The flowers are definitely not crowded together in the cluster, avoiding a trait that completely spoils so many otherwise good doubles. The bronzy hue of the new growth is another uncommon character.

SUNSET, CDE; Plant Pat. No. 937.

A striking late **double** that is unusual in several respects. Buds are deep mauve carmine; the fully double flowers with numerous long "petals" are large, over an inch wide and ruddy purple. Comes nearer to a real "double red" than anything else we have ever seen. In our opinion this surpasses Mrs. Edward Harding.

SWEETHEART, BDE; Plant Pat. No. 1128.

The very striking and unique contrast between the color of the buds and open flowers makes this a most desirable variety. The buds are deep ruddy mauve. The open flowers are medium large, **double**, palest possible lavender, appearing almost white. Clusters are of medium size, borne in mid-season.

List No. 5301 for BUSH, CLIMBING
and TREE Roses for 1953-54.**

Oriental Magnolias

We grow what is probably the most complete collection of deciduous Magnolias in this country. During the war years seed for suitable grafting stocks was practically unobtainable. We are rapidly catching up and now take great pride and pleasure in offering this fine list.

All plants are grafted and will be balled at prices quoted.

SPECIAL VARIETIES

MAGNOLIA campbelli (7) CAMPBELL MAGNOLIA

10
rate
@ 100
rate
@

This grand Magnolia from the foothills of the Himalayas has been celebrated in horticultural literature for many decades, but owing to difficulty of propagation there have been only a few trees in the U. S. A. and none of these had been known to flower until the specimen in Golden Gate Park, San Francisco, first bloomed in the spring of 1940. The flowers are rosy pink and are said to range anywhere from 8 to 14 inches wide. It prefers cool, moist conditions and here anyway does not like the full sun when young. We are now producing this wonderful Magnolia in fairly good numbers and all our stock traces back to the tree mentioned above. Grafting should hasten blooming and in fact flowers have already been reported on some of our early propagation.

5	to 6	ft.....	9.50	9.00
4	to 5	ft.....	8.50	8.00
3	to 4	ft.....	7.50	7.00

campbelli alba (7)

WHITE CAMPBELL MAGNOLIA

A gorgeous pure white form of M. campbelli.

2	to 2½	ft.....	5.50	5.00

ORIENTAL MAGNOLIAS

MAGNOLIAS (continued)

dawsoniana (7)

DAWSON MAGNOLIA

10
rate
@

100
rate
@

A magnificent, vigorous and distinct species with large dark green foliage with wavy margins. Flowers in great profusion up to 10 to 15 inches wide, rose violet outside and white within. Very rare and stock limited.

5 to 6 ft.....	7.50	7.00
4 to 5 ft.....	6.50	6.00
3 to 4 ft.....	5.50	5.00
2 to 3 ft.....	4.50	4.00

liliflora nigra (5)

This is a very rare and striking variety. Buds are pansy black. Open flowers are almost that dark outside and dark velvety purple inside. Flowers are large and produced freely even on young plants. Do not confuse with *M. liliflora*, the common purple Lily Magnolia.

4 to 5 ft.....	5.50	5.00
3 to 4 ft.....	5.00	4.50

mollicomata (7)

A giant flowered species from S. E. Tibet and Yunnan similar to *M. campbelli* but of a paler blush pink color. While trees are said to come into bloom sooner than *M. campbelli*, the flowers open later in the season.

3 to 4 ft.....	7.50	7.00
2½ to 3 ft.....	6.50	6.00

mollicomata x campbelli (7)

Original plants raised from seed collected from a good form of *M. campbelli* and pollinated by *M. mollicomata*.

3 to 4 ft.....	8.00	7.50
----------------	-------------	-------------

sargentiana robusta (7)

SARGENT MAGNOLIA

An outstanding variety. Flowers are large and a beautiful blend of pink and white.

4 to 5 ft.....	6.50	6.00
3 to 4 ft.....	5.50	5.00
2½ to 3 ft.....	4.50	4.00

ORIENTAL MAGNOLIAS

MAGNOLIAS (continued)

***sinensis* (7)**

CHINESE MAGNOLIA

A lovely variety bearing pendulous saucer shaped pure white flowers with showy brilliant crimson stamens.

		10 rate @	100 rate @
3 to 4 ft.		5.50	5.00
2½ to 3 ft.		4.50	4.00
2 to 2½ ft.		4.00	3.50

***thompsoniana* (6)**

THOMPSON MAGNOLIA

Large shrub or small tree. The large leaves assume a fine bronzy yellow autumnal tint. The flowers are creamy-white, richly fragrant, and borne freely over a long period commencing in May.

2½ to 3 ft.		4.50	4.00
2 to 2½ ft.		4.00	3.50

***veitchi* (7)**

VEITCH MAGNOLIA

A magnificent hybrid of *M. denudata* x *campbelli*. Very vigorous and quickly making a large tree bearing a profusion of rosy pink flowers of great size.

5 to 6 ft.		7.50	7.00
4 to 5 ft.		6.50	6.00
3 to 4 ft.		5.50	5.00

denudata (conspicua) BCD

YULAN MAGNOLIA

Pure white with a delicate pungent fragrance.

denudata Triumphant (new), ABC

A new form with large rose colored flowers.

liliflora, ABCD

LILY MAGNOLIA

Growth shrubby and erect. Flowers deep purple outside.

soulangeana, ABCD

SAUCER MAGNOLIA

Large shrub or small tree. Flowers basically white, flushed purple on outside toward base of petals.

soulangeana Alexandrina, XABC

ALEXANDER MAGNOLIA

Large cup-shaped flowers, deep rose right to the tips, white inside; early.

MAGNOLIAS (continued)

soulangeana amabilis (M. alba superba), ABC

Flowers are somewhat purplish at first, becoming nearly but not entirely white when full open.

soulangeana Burgundy, ABCD

BURGUNDY MAGNOLIA

An unidentified but very pleasing and distinct form. The flowers are much larger than type, well rounded, purple about half way up on the outside of the petals.

soulangeana Brozzoni, BCD

BROZZONI MAGNOLIA

A very fine variety bearing huge flowers (up to 10 in.) when fully open, white slightly flushed at base.

soulangeana lennei, XABC

LENNE MAGNOLIA

Bears enormous balloon-shaped, very deep ruddy purple flowers. One of the latest to bloom.

soulangeana lennei alba, AB (new)

WHITE LENNE MAGNOLIA

Flowers large, pure white, cup-shaped. Habit of plant similar to M. lennei. A welcome addition to white flowered Magnolia soulangeana types.

soulangeana rubra, AB

Flowers are distinct in that they are definitely rounded, not long and slender. Color is a deep ruddy purple to tips of petals.

soulangeana rustica, ZYXABCD

PURPLE SAUCER MAGNOLIA

Large, rounded flowers deep ruddy purple to tips. A very vigorous grower.

soulangeana San Jose, XABC

Comes into bloom very early and is certainly the largest of the light colored soulangeana forms. Flowers white lightly flushed pink. General effect is pink.

soulangeana verbanica, ABC

Very large flowers fully colored light purplish-pink. Unopened buds long, slender and pointed.

order discount offer under
"QUANTITIES" on inside back cover.

Flowering Quinces

Chaenomeles (Cydonia)

C. cathayensis and its hybrids (6)

All others (4)

Our 18 years work in breeding better forms of Flowering Quince has been recognized by both California Horticultural Society and Royal Horticultural Society (of England) by their Awards of Merit. With two or three exceptions every variety we now offer was originated by us.

N. B.—Cathayensis Hybrids are rated (6) for hardiness so not recommended for Zone 5 and colder. All others should be safe wherever any Flowering Quince thrive.

AFTERGLOW, BCD; Plant Pat. No. 847.

Lagenaria type. Flowers are large, **double** and at first snow white gradually becoming soft rose as the blossoms age. Leaves are dark green, long and slender. Growth is vigorous.

AURORA, CD; (new)

A "miniature" Cathayensis Hybrid with beautiful bi-colored soft pink and carmine-rose flowers, borne in great profusion. Late.

CHARMING, BCD

Superba type. Long, unbranched, thornless shoots bear a profusion of soft shell-pink flowers deepening toward the ends of the petals. An orderly shrub attaining a height of about 6 ft. East of the Rockies it is obtainable thru Wayside Gardens, Mentor, O.

CORAL BEAUTY, BCD

A superba type of spreading growth likely to be wider than tall ultimately. Free blooming; late. This variety was selected particularly for its charming "pastel" coloring. The flowers, some of which are semi-double, are rosy coral, lighter at center. The petals are frilled at edges, adding to its beauty. We consider this one of our very best varieties. East of the Rockies obtainable thru Wayside Gardens, Mentor, Ohio.

MINERVA, CD

A "miniature" Cathayensis Hybrid of low but erect growth. Flowers are enormous, deep but vivid rose red.

MT. SHASTA, CD

Lagenaria hybrid. Buds are lightly tinted lavender rose but open white except for faint pinkish lavender at tips. Flowers are unusually large with overlapping petals and borne in utmost profusion. Growth moderate.

RED CHIEF, BCD; (new)

Cathayensis Hybrid. A splendid new **double** flowered form offered for the first time this year. An erect bush, flowering medium late, bearing two and three crops of flowers. Blooms are large, ruffled, double deep red.

RED RUFFLES, BCD Plant Pat. No. 941

A Lagenaria type of medium strong, erect, growth almost thornless. The flower petals are so large they overlap, producing an attractive ruffled effect — something entirely new in Flowering Quinces. The color is a dazzling brilliant red. We believe this to be the best red to date.

ROSY MORN, BCD

A Superba type but may have some Cathayensis "blood." Medium height and bushy habit. Flowers are very large, over 2 in. broad and borne profusely. The color is decidedly out of the ordinary, a very soft carmine to Porcelain Rose. The showiest of the early varieties but also produces a very late crop giving it a remarkably long flowering season.

FLOWERING QUINCES

ROXANA FOSTER, CD

A Superba type of slow and orderly growth, branching freely. The color is deep shell pink in center, deepening to carmine rose at tips. The flowers are borne in remarkable profusion in mid-season. Available in Texas thru The Foster Nurseries, Houston, Texas.

RUBY GLOW, BC;

Superba type. A remarkable rich red with showy golden stamens. Petals frilled or ruffled. Almost thornless.

TEXAS SCARLET, CD

This variety belongs to the Superba group, is of low and bushy habit and practically thornless. The flowers are very large, over 2 in. broad and borne in great profusion over a very long period. Color is a beautiful watermelon red. Available in Texas thru The Foster Nurseries, Houston, Texas.

Please Note

All prices and other quotations not accepted to date are hereby cancelled.

Prices

Because of rapidly changing conditions we reserve the right to revise prices in this list if necessary, but we will advise all customers of any changes made before date of shipment.

All prices herein are strictly net, to the trade only and for goods at our nursery unless otherwise stated.

Quantities

In accordance with our long established custom and in order to stimulate advance sales, the hundred rates shown in this list will apply on all orders for 5 or more of one kind and size received up to November 1st 1952. After that date 25 or more plants of one kind and size will be supplied at 100 rate and 5 or more at 10 rate, but for less than 5 there will be a surcharge of 20 per cent. This plan avoids the bother of showing needless "each rates."

Pots. If pot grown stock is desired in the clay pots, a charge may be made for the pots at cost.

Terms. To buyers of known and established credit, 60 days net from date of invoice. Otherwise cash with order or 25 per cent with order, balance C. O. D.

Grading. Plants wider than tall are graded by width.

Packing. At cost as usual, including paper pots if used. Plants will be packed to secure the lowest possible classification consistent with the nature of the goods shipped.

Warranty. Seller gives no warranty, express or implied, as to the variety or productivity of any nursery stock he sells. Liability in all instances is limited to the purchase price. No liability is assumed by the seller for delay or failure to deliver caused by wars, strikes, fires, floods, droughts, embargoes or any other contingencies beyond seller's control. If the purchaser does not accept the goods on these terms they are to be returned.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyers risk. Please state distinctly whether you wish goods shipped by freight, express or truck line. A moderate charge will be made for delivery by our trucks to areas over 50 miles distant from nursery.

Complaints. Must be made in writing within 10 days after buyer receives the goods.

IMPORTANT NOTICE FOR EASTERN NURSERYMEN

Out here everything east of the Rockies is "Eastern"!

During January and February we ship several heated refrigerator cars to eastern points. Where size of order justifies, we can nearly always arrange for carload service to destination or some nearby point for pickup or reshipment. The total transportation charges for each car will be prorated among all customers who have goods in it.
